

Vim's Expanded CDE Capability: Member-Level Matching

Bridging the Gap: Retrieve clinical data even without known clinic information.

1. Customer Submission

Share generic file, clinic information not required.

2. Vim Patient Matching

We match your members against our provider network.

3. Data Enrichment

We add critical identifiers like Vim Org Key and Patient EHR ID.

4. Standard Ingestion

Triggers automated chart and report generation.

Key Benefits

Reduced Admin Burden

No pre-mapping members to provider sites.

Higher Accuracy

Vim's internal identifiers improve matching success.

Pilot Program Considerations (Currently in Beta)

Semi-Automated Workflow - Involves some manual oversight for accuracy.
