

Unlock Impact at the Moment of Care

Vim exists to power a more connected, intelligent, and collaborative healthcare system. We enable providers, EHRs, payers, and health tech innovators to work together through modern infrastructure that brings innovation directly into clinical workflows.

The Industry Reality

Solutions Outside the EHR Get Ignored: Even the best tools go unused if they require switching systems, extra logins, or break clinical workflows.

Integration is a Roadblock: Getting into EHRs is slow, costly, and fragmented. Every new integration means new technical lift, long timelines, and repeated bottlenecks.

Adoption Depends on Clinical Ease: Care teams won't use tools that disrupt the flow of care. If it isn't embedded, it's invisible.

The Vim Connect Platform

Vim Connect removes the drag of outdated integration models and gives your application instant access to our expanding network of EHRs and care teams.

Remove Integration Complexity

Focus on building value, not fighting EHR obstacles.

Build Once, Deploy Everywhere

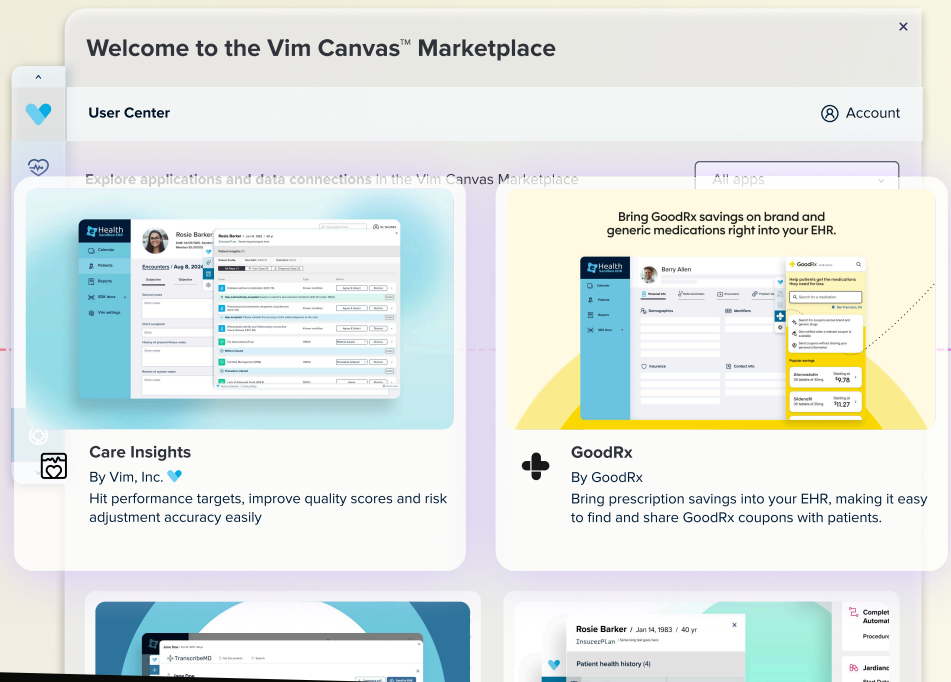

Deploy your solution across our growing network with one integration.

Accelerate Time to Value

Launch pilots in days, not months, and scale rapidly with modern, secure infrastructure.

Instant Reach

Put your app in front of 50,000+ providers and care team members with the **Vim Canvas™ Marketplace**, directly inside the clinical workflow.

Care Insights
By Vim, Inc. ❤️
Hit performance targets, improve quality scores and risk adjustment accuracy easily

GoodRx
By GoodRx
Bring prescription savings into your EHR, making it easy to find and share GoodRx coupons with patients.

How Building in Vim Connect Works

Plug-and-Play SDK

Get started in minutes with flexible onboarding and developer-friendly tools.

Context Aware Workflows

Access rich, real-time patient and encounter data for in-workflow experiences.

Automated Write-Back

Support documentation and care team actions, streamlining completion and delivery.

Growing EHR Network

Build once and instantly access an expanding list of EHR connectors. No need to start from scratch with every new EHR.

Admin & Self-Service Options

Empower teams to configure, activate, and manage users on their terms.

Compliance First

HITRUST, SOC 2, and HIPAA certified. Enterprise-grade security by design.

Ready to see it in action?

Vim Connect is trusted by leading health-tech innovators to deliver value right within the EHR.

Step 1

Explore

Review the SDK and request sandbox access.

Step 2

Build

Define, test, and iterate in real clinical workflows.

Step 3

Go Live

Submit for review, typically launch within a week.

Step 4

Scale

Track usage, update your app, and expand rapidly.
