

# Making Healthcare Smarter, Faster, and More Connected

The first developer platform built for healthcare, **inside provider workflows.**

## What Is Vim?

Vim is a provider enablement platform that connects the dots across healthcare, bringing real-time, actionable tools into EHR workflows. Some are built by Vim. Others come from our partners. All run on one secure, scalable foundation.

It's like the App Store, but for healthcare, and built directly into the EHR.

## How It Works

Step 1

We connect to data sources like payers, HIEs, and analytics platforms.

Step 2

We surface insights and workflows right inside the EHR

Step 3

Providers act instantly with no logins, portals, or delays

## The Value We Deliver

### Saves Time:

Manual tasks that took minutes now take seconds

### Reduces Burnout:

Less screen-jumping means happier, more focused providers

### Improves Performance:

Smarter workflows lead to better, more efficient patient care.

### Scales Fast:

Apps go live instantly everywhere the platform is installed.

## Why Vim Is Different

Works inside the EHR workflow

Read + write capabilities (not just read-only)

Apps deploy instantly to thousands of users

Go live in under 30 days with implementation measured in days, not months.

is the new foundation for **connected healthcare.**

## Core Applications

### Care Insights

Real-time risk and quality gap opportunities

### Clinical Data Exchange

Complete, automated patient view

### Order Assist

Smarter referrals to high-value specialists

### Rx Assist

Medication suggestions to start, stop, or adjust

## Third-Party Applications

Healthcare developers build apps using Vim's SDK

Apps are instantly available through Vim Canvas™, our in-EHR marketplace

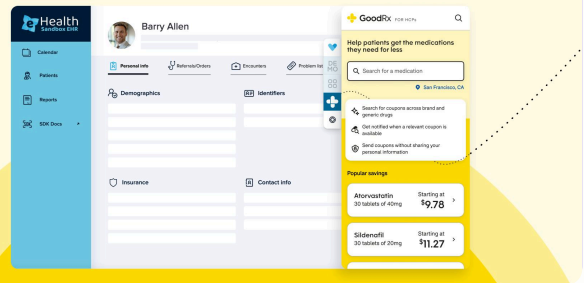

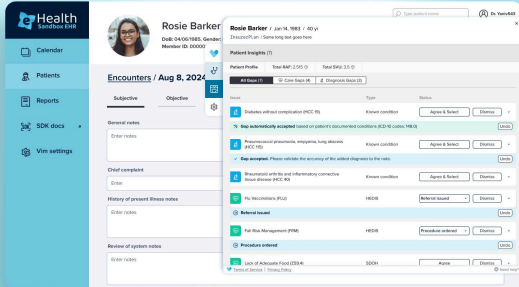

## Welcome to the Vim Canvas™ Marketplace

User Center

Account

Explore applications and data connections in the Vim Canvas

Bring GoodRx savings on brand and generic medications right into your EHR.

### GoodRx

By GoodRx

Bring prescription savings into your EHR, making it easy to find and share GoodRx coupons with patients.

### Care Insights

By Vim, Inc. ❤️

Hit performance targets, improve quality scores and risk adjustment accuracy easily
